## ABOUT US

Tharwat-Alabdaa Contracting company is one of the very fast-growing companies of Saudi Arabia established since 1997 named as Bin Sudayi Establishment, & later change to Tharwat-Alabdaa Contracting (TACCO) as one of the leading Cross-Country Pipeline Earthworks specialists, amongst other specialist discipline companies.

The company's position has evolved over the past few years with an increasing number of Cross-Country Pipeline projects and an upward growing turnover. As the workload has increased the company's profile has been enhanced, by providing further opportunities for greater abilities to be demonstrated.

TACCO competes with large national organizations for projects in the local market. TACCO is frequently approached directly to participate in large-scale, Cross-Country Pipeline specialized projects where previously only international companies have been considered.

We perform total turnkey contracts or act as subcontractors with local & international contracting companies. TACCO has been involved in major expansion and development of Pipeline projects in Saudi Arabia.

### VISION

To sustain the high level of qualified personnel and build a professional team committed to serve our clients. Our pledge is to establish lasting relationships with our customers by exceeding their expectations and gaining their trust, through exceptional performance by every member of the construction team.

### MISSION

To be the leading local firm in the Kingdom of Saudi Arabia in the field of road infrastructure and construction. TACCO will strive to offer excellent services by providing high quality of work, applying the latest available technology for the industry, and seeking more joint ventures with National and international companies to have the opportunity in higher valued projects.

## MESSAGE FROM THE PRESIDENT

THR Wat al AbdAA Contracting Companies (TACCO's) overall business attitude is shaped by our overall value care. We acknowledge that, in the long time run, success in business can only be achieved, if a company takes adequate care of all stakeholders in the value chain, namely employees, customers, shareholders and the society.

Our organization builds upon this foundation, with a work force that has diverse industrial backgrounds and in-depth understanding of the current challenges facing the sectors, such as ongoing changes in technology, globalization, outsourcing and consolidation.

I am confident, with our client's continued feedback and support, our quest for improvements in our service deliverables will result in high satisfaction level. And I am certain, the emplacement of these strategic initiatives, will certainly drives us forward to the International stage, in terms of our business culture and commercial competitiveness.

Owner: Mohammed Saleh Al-Marri
